IRUPAM CHAKMA : Pu Speaker thank you. A few words
STER seems to be clarified. Some
points of honourable members
Pu Zasiama Pachuau, hon'ble
er from Ngopa, Pu Ngurchhina, Vanlalaiva. Regarding the
ormance and the problems with Mizofed. First of all
uld like to thank Pu Zosiama Pachuau, who has priest
performance of MIZOFED and the department of Co-operation.
FED is really doing well, it will soon a temendoss
ss comparing to previous years and hope this Auto-
is body will bring a success in the future also.

The initiative taken by MIZOFED which highlighted by Chairman itself Pu Zoramsangliana, regarding the initiative taken will be come self-sufficient in all well. MIZOFED proposed establishment of well extracting unit at Zuangtui the Industrial State where about one hundred quintal of mustard, and sesemum will be.. well and the project is really hopefull for and one expecting that initiative taken by the MIZOFED to become self-sufficient and edible well to bring a new face to the body. This will be helped the people of Mizoram as well as the performance of the Co-operation department. The Co-operation department has taken up the initiative to pay the challenge which we called self-sufficiently meat and vegetables.

The last all-India Co-operative week celebration at Aizawl we had a seminar where we discuss with concerned Co-operative Society to meet this challenge to become self-sufficiency in meat and vegetables. Now various steps have been taken to tackle with the problems as we all know, Mizoram is really depends upon the supply from Burna and outside state of India, for meat and vegetables. I think this challenge which we have taken will bring a success there is no doubt. We plan to have seminar in Lunglei District and also in Saiha in the coming months.

Now Co-operation developments as we all know involved the mass people. It is a movement of mass people and we want to convert the movement every person in the state. Now the population of Co-operative Society excces more than one lakh percent individual and this year we hope the number will be increase tremendously.

Regarding the problem with petrol our supply Minister has already answer the question but Pu Zosiama's question was neglected as there was no time to answer that. But still I want to inform the House there are 43 staffs in the POL Wing of MIZOFED. According to their work load we feel that the present strength is sufficient. If it is not sufficient MIZOFED brings the Autonomous body they have put a directors they will discuss these problems when there is suggestions from the Hon'ble Members.

Now there is no much highlight about the Sericulture Department today and we thanks the hon'ble members because what I presume is that they have seen the performance of the Sericulture Department (the achievement what I mean) and in the future it is written in Governor's speech also the effort will continue during the financial year also.

Hon'ble Members Pu J.Thanghuama has pointed out that he does not like suspension, that may be his personal opinion when we go the rules, it has to be done according to the Rule and the suspension case in Sericulture Department is completely in

accordance with the C.C.S Rule. That should be my answers Mr Speaker Sir, regarding the points raise by Hon'ble Members. But I would like to express my personal satisfaction The initiative taken by the Agriculture Department, when we seen page two of Governor's speech, this points were not raise by any body in the house today. It goes like this, "During the next financial year emphasis will be given to Jhum Control Programme under the New Land Use Policy for which suitable compact areas will be selected in Rural Development blocks along the international and inter-state boundary," The spirit of this programme which is likely to be under taken by the Agriculture Department, there are may be some other department also which should be involve. But what I sees is this the programme will have well purposes ones to give stress in food grain production and also it seems that the programme will really contribute in preventing in filtration from outside Country because when people will be settle permanently, the boder will be safe, and this policy of the Government is really appreciable will not have at least the imprehension of infiltration. So I would like to thank the Agriculture Department for their very very good initiative.

Lastly I would like to clarify which the District Council Affairs Minister have not answer the question of or the point raise by PU J.Thanghuama. Regarding the district council he said ones district council is reffered he did not refered that specific but a presume that there should be the Chakma Distret Council regarding the School Education in the District Council Area. When we see the provision of Sixth Scheduled in the constitution para 6 provided powers of District Council to establish primary schools etc. In the third para one the last two sentence goes like this may prescribe the language and the manner in which primary education shall be imported in the primary schools in the district council. Now it is veru clear that it is the District Council Authority to decide their Primay Education Policy within the District Council. And it is very clear that the Government has no right no power to alter or to form the policy. Therefore the Hon'ble Member should understand let the District Council do it the meeting aid with this few words I thank all of you

Ka lawm e.
