 say, a reply was madu to a quostion like, "Docis the Govt? knew that four passeneers wore killod in motor nocident at GExizoi?"。
not satisfled with the reply, "supplenentary question arises as, have many died in the spot and in the hospital, or what type of vehicle it was, or was the Driver drunk? These are all public interests and relevant to the subject. But, it is unnecessary to ask how many of them were male or female. Besides these; if a supplementary question arises like how many persons were killed in an accident at Sairang road. Though it was also motor accident, it is not rolevant at and, because, the maln question asked was the one at Ngaigal not at Sairang road. If we go like this, question will come up regerring to places as far as Lawngtlai or Champhai and will meet no end. Therefore we must know tho best use of this valuable time.

The Minister 1/c may not give answer on condition that the roply is not yet completed or the question is not relevant to it. But, in this valuable time, MHister also try to answer the questions, if they refuse to answer there wlll be no way to force them. But if a partioular Minister very often fails to ifive answers, I am sure the House will have some idea about him. So, Ministers will try to sive replies to questions which can be answered and which are of public interests.

Tben will take up question No.18, of Pu Lalsanezuala, As we have not much questions, I wlll request him to read out his question instead of quating the number only so that it will also be casier to follow for the others.

PU LALSANGZULIA: Mr.Speaker Sir, Question No. 18
(a) Will the Minister 1/c Supply
please answer Whether it is a fact that the average cost of airdropping in Mizoram if is 700/- per quintal?. (b) If so, how has this figure
been arrived at?.

PU R.THANGLIAN: . Nr. Speaker Sir, the question asked MINISTER.
by our Hon'ble Member Pu Lalsangzuala is wheather it is a fact that the averaje cost of air dropping is is $700 /$ - per quintal. If so, how has this figure been arrived at? liverage cost is not known correctly as information about costs of supply dropping equipments, like parachutes, Jerry-can etc. The information is being sought fron the Minister of Defence, Govt. of India. Therefore, it cannot be dadd wheather it is Rs 700/- or not.
 question: acorijus to the
 Supply Minister, said that cost of :ir iropinjis is 700/per quintai. I sousht this information because I fell that the roports given by "izo insi" no lit rolialsie. The sane fion'ole ifinster had inimect tis fuse that Rs 650/- is the experiditure. Thus there is a sveing of Fs 50/-. H1rc chareo or a Dolvota plane is about Bs 360/per hour and avoraje flisht or 3 hours woull cost pis 4,080/one load is about 30 quintals, rin 17 zuny boss are required for repackins one quintal. Garriase fron Silchar to Kumbigrom involves about is 2.50 por quintal, also Rs 2.50 for storare. $5 \%$ loss is allowable, and when del these are calaulatod dropping charse of one quintal works out to Rs 260/-. If the droppine cost is soid to be Rs $700 /-$ a quintal, then who pockots the belunce of noarly fs 500/-?

PU R.THLNGLILNK: DEV. ITNISTER.

Wr. Speaker, althourh the raember says that he does not trust Mizo Arsi, but I think he asked the question because of his trust. I don't evon know to hävo stated that Rs 700/per quintol is the exponditure, but I havo learnt from Pu Ray (I.C) that this is the approxiante cost. I have not known anyone saying that the cost is $950 / \mathrm{m}$ a quintal.

Tho true position is that it was calculated out last year that the cost is about is $6 / 50$ per Kg , but this calculation was not accepted as thare were some mistakes. This may have been tho one referred just now. However we may say the fisure is roun about that one. Leain, what the member pointad out will not be correct, the file is jeini searched now, and correct risure will sonn be known. The onst is different from one to nother. In $4 N-12$, it can be as ruch as 1s 10,00, and cxponse for one hour in holicopter is wore. But there is no need of usine it for droping suppicrs. The rates is asain differeent for tine typu of blane which we oall "Twrin-dody" Planes. Inkat, is tine cheopest, but hore is spont for supoly rampins equipmonts. Generally, Dokota loads about 25 Quintals, deluctin the wei, ht of all supiply dropping equipment, this works out to 20 ouintals of rice. Therefore what the nember point ut in zeriural connot be true for all practical ourposos.

Lus I have not got the file yot, I also could not say the exact fir fure (Filo has arrived) cost of air iropoins varims accurlin; to the typed of Plane. In inf-12, it is is $1340 / 50$ por quintals, in MI 4 , Rs 1115/-por quintal.

PU VANLALHRUAIA: Mr. Ojoaker Sir, Supplementary
question: Pu Lalsangzuala said that
the Pinister regarded "Mizo arsi" as in-correct; but asked tho question now. Supplies are now carried by headloads, but it appears this will become a failure because in some aroas even a quintal has not been delivered. So, then what may be the policy of the Government?.

PU R.THANGLIAN: Mrosoencer Sir, amall quantity is DEV.:INISTER. reserved for axceptional cases, and will be carried. But it is considered that oll these according to the type of aircrarits. hricl the cost of the aridropping equiprents, paid by book debits, have to be known from the Accountant General and the Defence Kinister Without getting the information from them, the actual cost of airdropping canot be swid yet.
 ambuncoment macle by the vinister that arradroppine in Mizoram is stopped with effect frum $16 ; 12 / 72$ int vill bot bo done anymore. Considaring the pirjiens, wil it not be possible to resort to arr-dtojuinj acoin?
 DUV.MINISTEP. tie fri.2. ustion, when supiliozs
are vr.ios of Kerosine oijo
Mo oil etc., are al so carizer atemen airdropine is done, only the airdroppe ite an whe tion agos, and there is no sile bonefius $a^{\prime \prime}$.

Ent if sunj эз are carried on head
loads, there could be earnings oy vehicle - omers and the villagers, Moreover it is also the desire of the Central Govt. that we should try to earn something under this operation.

When aixdropping is done, the extra amount involved is borne by the Govt, and not by the public. One quintal can reach Aizawl at the cost of $18131 /=$ and on the average about is $146 / 4$ is required for one quintal when we consider the whole State. But if we resort to headload transport, the expenditure wi, 17 go up, through it is not known what may be the approximate rate.

PU LALIHMNGTILNGG: Nr.Speaker Sir, suplementary ques. tion: If it is As $6 /=$ per Kg for airdroppins, the rate will be same everywhere. And it will do quiot beneficial for jeep owners to take loals by vehicles. Buit comparine with air dropping oosts, what would be the breakup price? Is the rates same for Tuipans nd dizawl? If not, who bears the transport costs?.

PU R.THINGLTMNG: DEV.MINISTER.

Mr. Speaker Sir, the comon people nevor pray, because the Govt. subsidisod, und this is the continuation of the former practicos. The rutu by which we boueht sice at Silchar $F C I$ clodown is abut Rs $111 /$ - por quintal, and the excact freight chare to dizawl is Rs 10:29/-per wuintal. So the price c.izes to about fi 132/-. But including storasc dharge and P.C. loss, it comes to about Rs 146/-per quintal for cvorywhere in lizzoram, regardles of sough, interirl posts. S, poal irice js fixed at As $20 /$-basing on calculati in made in tho past. The cost of airdroppine comes orounci is $146 /-$ now, we have proposed to takc and by headlond, ind if so, in order to meet the increase, the rate of rice neods to be inereased also. It has not yet possible in wrim out yet what may be the necessary increase.

PU VhNLhLHiruala: 1 re. Speaker Sir, Supplenentary question: the Uonlble Vinistor said that salt, Moil, Sugar were also airdropnet, will this be continued under headioad system?

```
R.THANGLIaNA :
DEV.MENISTER.
```

Mr. Speaker Sir, Salt and Susar are Deine carrice now. Salt is not inclubed in the state Trading hccount and is supplied to far off olaces only. Though Moil was dropped by air but now Moil and K. oil are not included for carriage by headioads. We are to transport even rice as we desire, so we cannot inclute these items yet. After corpleting the supply of rice, perhaps these other comodiaties may be included.

PU HIPHEI : DY. SPEAKMR.

Mr. Speaker, Does the Govt. posting substitutes for these Govt. servants who have sane back iron supply duties to their parent dopartments?

The prescribed load of 25 Kgs appear to be too heavy, is there any intention to change this?

PU HRANGAIA:
It Speaker Sir, from the discussion.
I gather that airdropping cost is higher, but although the Minister State that the rates hed not been finally fixed, I cannot understand how the price of rice need be increased if resort is made to bransport the rice by the system involving lower rates. Can this be explained?.

PU R.THiNGLIANA:
DUV.MNNSTER.

Mr Speaker Sir, this is often misunderstoud by most people. These accomodaties are very cheap, because of subsidy of the Govt, and now large amount has to be spent for its carriafes. GJo, there is difficulty to continue subsidising by the ovt. and the Govt also advices us to be suffaring in this regard. We also think it may be better for our people in the long run.'

It is a notice mado by one Member concenning Mindster, and has public importance. We havo not had such notice before. The Member concorned will speak First and the Minister concerned will make the statement. Debate cannot be held now, nor is it necessary to take vote. But if any member desire to have a cicbate, he shall submit a notice to this Secretariat and wo will fix up the time for 1 t.

But if the momber sivine notice wants to ask supplementary questions or clarifications, he may do so, which the $\begin{aligned} & \text { inister concerned will reply them. }\end{aligned}$

The Minister concornod con answer till Government policy and opinions besides the fact. The caller can also make sugjestion, but it cannot be a request for obtaining Government assurance. Members whose names are not included in the list of business could not speak.

Now, I shall call upon Pu Dotinaia, the mover of this cadining attention, to speak.

PU DOTINAIA: Mr. Speaker Sir, I am vory please for your acceptance to my calling attention. So, let me read it our for hon ourable members.
"Sir, I beg to call the attention of . the Minister i/c Supply Department under rule 54 of the Rules of Procedure and Conduct of Business the Assembly to a matter of urgent public importance and of recent assurance, namely to the news item published in the "TrWaI BhWM" a local daily newspaper, relating to non issue of rice and sugar to the Govt. Fair Price Shop Dealers in Gizawl, and request the Minister to make a statement in the House in this regard.

Some days back, supply of rice and sugar is very difficult and we can get sugar at is $5 /-$ and rice at $\mathrm{Rs} 2 /-$ per Kg . It is published in the newspaper like this Creading, out the outside from "iawrh Bawn' dt 13.3.1973). So, I moved for the Govt. to take action to prevent repetition of such difficulties caused to the public only for the faults of one or two persons.

It is the pretice that the Departs ment checks the accounts of the retail, $=s$ romy yoar, which noy be at any conveniont tiae. ds many as six cases of malpracticas, rolatin? to Iruasury Chnlans were detected at the boginning of this month. Wu then realize the need to check their acounts and tou-Inspectors took 5 days to check the accounts oi the $3^{4}$ retailors at hi zawl. And as many as 12 casus of similar maractices of tho retailers wore detected.

During these 5 days tive Department was a bit more libernl in issuins $S_{p e c i n}$ rermits for rice and Sugar becausc ordinary issue to the retailers was stopped. This was the prevent the public finding groat hiriship. But, it appone: that the price of rice in open market ruse up anyhow.

It is now proposed that instead of 34 Retailors, we may have lower ietuilers, so that the Retailers may have sufficiont mantity to deal with.

It is rodily resrotablo that the public had suffured ourtre this pori 1 . your own copy.

PU J.THiNGHUMM: Mr.Spaker Sir, we nnve already pass As 20,00,000/- last yoar for air dropping. But air dropving service is st pped and we have to pay is $3,60,200 /$ - nore becuase of the ttansoortation by vehicle. So, dues it rean transpertation by vehicles involve mora expenditure than air dropping? If so, why con!t ve continue air dropping? and why is the rate of rice increasine?

PU R.THANGLIANA: Mr.Speaker Sir. It is rather an MINISTER. additional expenditure for transportation by Vehicles, and not because of the switch-over from air-dropping to transportation by vehicles.

PU LALSANGZUALA: Mr, Speaker Sir, I don't object this at all, but is it a fact that the honourable Minister said that we have not much use for transport wing but only because of the stop page of airmropping?.

PU R.THINGLIANA: Mr.Speaker Sir, we make use of it, MINISTER. but because of the stoppage of air dropping we can use public vehicles. This, however, is placed under the head"26 Misc.Deptt".

But after he was reinstated, the post was still occupied by one who officiated during his suspension. That means post has two incumbents. They workeu together from January tili now, drawing equal pay. Who will now pay the extra expenditure for one porson? Why does the Government make this payment?.

Some days back, Dcvelopment Commissioner made en advertiscment for the posts of Lecturers in different subjects for P.Mag Gollege 1 It was notified on 8.7.72 and closing date was 10.8.72 Stating 2nd class M.A. as minimum qualification. So, it can be applicd only by those who passed M.A. prior to 10/8/72. But, contrary to it, those persons who passed M.A. on 27.10 .72 are appointed. So, I want to know how it can be.

Again, recently, the Govt. made a Common List, working out seniority of Govt. Servants. But I want to know why the same Principle on the Common List was not used in the case of High School teachers.

Usually propotion in Govt. High Schools are according to seniority. For instance, in 1956, pu Lalhmuaka was transfered to Lunglei as Head master due to his seniroity. But now, those who have 20/30/ years' experience are left out and newly appointed people were promoted. I dontt have any personal grudge, but rather glad at their promotion. Yet Mamawii Girls High School is a ncwly formed institution but is among those 7 Schools now provincia a- lised. So, one who is in a newly formed School having only about one year service has gone up, while some teachers of Lunglei High School, having more than 20 years service, are remainning down below. Some members are said to have given to confirmn some persons as Headmasters during clection compaign. This kind of politics in educition sphere is a very bad practice. It will bo a great sorrow, if all the Primary School teachers have inclination towards Mizo Union Party.

Again, Mr.Lalthanzauva was proved to have a forgety B.Sc.Certificate, from D.M. College Imphal. This wol verified from Asst. Controller of Examination of Gauhati University, and the matter was informed to Director of Education, Mizoram. But uptill now, he is working as Headmaster, not only that, he was appointed as ת.O. So, I want to know
why the Covernment docs not tor an action on this till now.

In Chanczawl alsc, one pusson is appointod as L.P. Teacher avon thouch he was not appearing in the selaction examination. Whereas, the oxam was to be held at Satual ne staye in aizawl during the cxan. So, how could ho lx appointeda.

SPEAKER:
Demand NO. 15 has binin moved and do anyone $^{\text {dind }}$ of you like to seritanything?.

PU LALSANGZUALia: Mr.Speaker Sir, I hac askert the possibility of promoting Junior Nurses to Senior Nurse after comiletins 15 years of sorvice, and the answer was in the nagotiv. There ar, many who have had more than 20 years service. It seums therc is wrong practice. (Spoaker - pulicy matter is to be dealt in the afternoen) Thon, Thank ycu.

PU LALKUNGA: Mr.Speaker Sir, I don't find it necessary to pass such a huge amount, as we have alroady passed Rs $22,70,00 \phi$ - for grouping Centres, since these are presumed to be provided for medical and dispensary buildings. If this is for something else, how c,uld such a big sum be spent before 31.3.1973?.

PU VAIVENGA: Mr.Speaker Sir, I find that members MINISTER.
are understancing to this demand. We arc only like"zero" before, having no approved supplicrs for modicines. But now, we have some approved suppliers and medicines are being despatched by vehicles and by voluntary carriage on hoadloads by villagers. The present demand is for some improvements made to the dispensary builrlings.

Mention is not male to the terrace of 640 acre in my constituency. Therofore, I find the provision of the budset is not comprekensive. According to my knowledse, 1 crure has been added because of Chicf Mristersi talk some iepartmental Heads had taken their proposals, without obtainine the Cabincts apiproval, for which ruason the plan schemes arc not up to what we expect them to be

Wo must work in accorclanco with the rules aftcrwards first toking Cabincts' approval. The Finance Minister had pointed out about agricultural loans, but thero aro many who dic not recelved fertilisers and seeds Banana seadings are distributed in subsidised rates but they are not fresh enough jor replantation. So, it Hay we better to change the systen of giving subsidey

Ls I looked the achicvements of soil Conservation, and EGS prepared by the Dov. Departrental 13 villag 3 s were given grants ror construction of playgrounds. In Sateek constituency alone, 3 villages wore given. I think it is bettor to spencl the money sanco tioned for $\operatorname{BGS}$ and CSiU arca wisé. isyain, quite a lot of money is spent for land reclantion and it is necessary to ive farmers now. Fruit preservation is also essential.
is centro is propered to be opence at Vairencte wior fow perple can un it and I want to know whenever this proposal ande?.

Public Hosith Depnriment also proposed to give water supply to 8 grouping Contris. For water Supply purposes P.T.E. Department collocted about pipes of about 5 I'rucks 100 ? s which aro just lyine unused at Chhiahtlang now. It is vory jad to loave thines incormlete as a lot of mons: had been spont. I vant to let them have water supply som for it is a bis erouping contre. It is very necussary to first uarine tings cerofully.
cihu stari in the Load setilerent Department are very busy willo most people ure: for their lard sottlements iseculuse loms etc., onibl nut jo received without it. buin, I wan tice Govimmert to be more strict in collecting taxes.  thank the inin. Sinistor, the
Secretary and liisstaff for their work in proparing this buajet in so short a tive. If we are not please an the figure, wo must, however he pleased with their lobour in propering the book $S$, we are really in debt to them.

One yuar has gonc since Mizoram became Union Torritory and 2lnost a ycar has zone since nenbers took oath. Lo king back at the past budget, it is necassary to havo security in our land, we also had sald a lot abuut the necessity of peace and security in a party level and in privatc. Thero is yet no peace
and security in the minds of the people. Few days back, in the heart of Aizawl, just aficer ciark, the Power House was bombed. As it appears in the newspapercthe Govt. tried hard to find out the culprits and even asked the public on the luattar. Again nowadays, the end of financial year is approaching, and Govt, orficers and A.O's draw huge amount of money. In Lunslei we don't know what to do, because No A. O's wanted to keep Govt. money as there is no security: So, it wesulted in non payment to employees while they press for payments. It is not sate even Inside the offices during broad day-Iight, because some gangs snatch some money away. That is the condition existing today. Thay snatch is $50,000 /$ - from the hands of Finahthial A.O. a Jow days ogo. Do we provide them security. Due to the distrubances, we are facing several hardships.

We hope that in this new Govt. with the help of the Aduinistrator, the Enistors and the M.L.As we may find peace and security. Dut, as we look at the newspapers and the condition, there is no security in the country. . I rind that this will be a real cisgrace for those who take responsivility.

Last your wo hod discussod much about the security foress in Mizoral. The reason is that some of then raped oun innocent sirls, and fow of them were caubht. Especially we herr that last year during Octobor, iothuata of Huruane was killod by 19th Punjab Regt. We don't know what the authuritios have done although Engouiry Comicision was farmed. During that time one girl was raped it Hauruang by the same force. The culprits were caught by Ecnoral Court of tiuguiry and by Goneral Court Martial, they were punished to 3 to 4 years: imprisonment. hitor 21$]$ these had happened, a few days back Bi Kapbuanes of Pukpui wort raped by a sepoy from 19th Punjab Fieft. grain, and, he torturod her and her her daughter at night. We have informed iy telegraphed letters and vorbal reports to the Central Govt., the Lt. Govornor and the chief linistor: We adid these kind $\partial \hat{f}$ sepoys are not fit for socurity foreos, let them go out from our country. But, uptil now, they have not gonecut. Our country wil? never sat fireedom, peace and socurity if we have secirity forces who torture and Kill us without roason. It is nocessary for the honible merabers to lock into the riatter and fight asainst it.

Gecondly, our contry is very unlucky. The rice before hervost were dostroyodi by cyclones for two consecative yo ars. Iast ycur 2 los , due to droupht we had harvest. We are to face fayinc. The Fin. Minister said" Thore will be difficulty in the future", we must propare surscless for it. rice should be stocked in the
inturior parts by hoad-loads and vehicles before the rain cumes. The works aro very soal but it appears we may not tako action. Recently thoy put Deputy Director
 Thoy prodsod hia to sut 20 voholus becouso those will be nocessary to transjorting riou iron Lundei to Domajiri and frorl Dena,iri it: Barnpansuri by boats will this be dre within this riry sonson? Io further demandod 30 vehicles hut ho was ivon inly 20 vohiclos, within $2 / 3$ dias, thej sont 2ll the rice, and had to step bociuse there was no wra ricu. Though he sent toiograns overyay tiere was no roply. his time and tide wait for ro ar, we will fued farine.

Thosc who enrry ricu idy havi-loads will soun bu busy in sowning and tic roiny suason will come, sonc intorior aruas in Cinimtuipui District, Mara District and Charia Distriot will surn Iy fecodificiculty. This is tio soneral pisture tar uphout Mizorar. So, it is nocessary fir the stan if Enis Diractorate to start working hard and t: cuerate with tinir orficers otherwise we will ive very show. Wo will nuver finish the tarjot duanc winter.

Trinu'ly, If like t.. spoak ab sut xricultural losns, tust rolef 沈c., volicle w distributed when people focos inriships. Thise wore not recovered. The

Lunglei District roveivel very Iittie in EGS . Thourh it is ajanst the rule, ropiz culu oven oy from Block Schenes insin at in cosh. So, it oun that perpe are willing to jay. But in Aizowl District, tho zuaduarter many

Fikus: who is t hosing ers Pre Lunglei Diserict $\therefore$ Econ difficulties ilue to tw, reasons, Firstly, तue tre the duarease w enn't ricuired onodeh amont, Bosias, thoy lia not axpain tho rilla to us. A short tim, after, 3 mon hole ikebers wont to Lunglei and saved the puole of their constituoncios from their hardokips ard holjod in thair ap, lienti ns mere brought, the anourt was alreney aistributol othor and ony fow ers, ns wall be sizible to jet the loans. I wulc lite to wauct the ifn'ble Finionister to

In regard to REG schu: es, the Lunizlei $D_{\text {istrict has } 20,000 \text { noro populatir } n \text { thon Chhinticipui }}$ District but funjui is girgn ony 3 lartis or So arainst morc than io 10 lakhs to Chininuind District. We do not want to doprive troir rortunc. Dut whenthe Lundei peorle obodiontly roys the lons, ay also descrve consideration. So, T ied that the porple of this kind would be troated arrely by the House also.

Noxtly, when I aske? the oondition of appointment and postinss, our iinistors ofton som to know nothing, Posting som to we at the Secretariat level arbitrarily. For oxodily, in respect to the reversion of sone $h, 0$ into their parent Department, orcers come Iron the Chief Secretary direct, but withuut arraneement of substitutes properly. The Cabinct may bo moro alert on these natters.

Lastly; the work could not be progressive as you contralised the administration here in Aizawl For example, if we aro to doal about the construction of a woll at Tewngkolong in Chhimtuipui District and Rahsi Vent of Lunclei, there will never some proerees in the work if everything is decided at the Developmont office et Aizawl. If the BDOs and other officers can spent only is 10/- Pa from Contingent fund, they will never bo able to senp all the noney in their hands durine their lifetime. Thorefore it is nocessary to delegate more financial powers to our officers,

As I also knew secretly, some officers draw money very ofton ajainst rules because there is no hard and fast rule. I lont roalise how the hudit will react. But, though they lare dy this in dizawl, that is rat possible in tho interior unless the oxecutive officors are given some apopiate financial powors, they woull not be dile to do any wrks, and the works will suffer. The Pinistry should acke proper ar. angement for this.

PU TIILINGALA:

simply try to criticize the buc, et but I want the authoritice to go on mokins, improvements. In the book, there is a smal iten whore larje mount is spent. That is CL \& CIs. These need not be seperate. Durinc the British oenin, they are used for interpretors but now, thare is mo more need. Their duties require no two Catosories. D.G uses the C.Is for pady roport and the Ministers use As. But their reports are never the same. These two should be malrariatec.

Thiuish there is a huic amount of money sanctioned in U.T., the noney going to the people is very lettle. The reason is thit the sanction goes to the departwonts, like P.W.D. ctc., and the public have no share. In view of tho dovelopment side the District Council poriod was rathor more desireable. The tissan Govt. Ginve us sonarato funds for the constructi on of villaje wolls, anc roads, and the money was share? by public. There is no more of that sart. Dise yeor has oone, but there had not been any lovelopriont isrants, syy, in my constituency. The public earned sometinin from the B. R.T.F. Therefore, the Union Torritory is where there are lots of employees and lots of nuey for buildings, but thero is notring for the puolic? It is said that 20 develonent bleks are areated. But where are thoy, when there are no BoD.O's?

Those neer to be aowe lookafter, naking rules and resplations. We subatiter road scheme for Chinizelinin to $T$ wi montojn. It hes been approved but it cen rot be in win will do tho work. Pravisusly win vii $\therefore$ re custruct roals within the.r own ville: rroer This the sublic ghould the monoy out, li.T, $G$, 1 on onsider this aspect,,$^{-n}$ so there will do lifficulty and berinir for some tine.

We have pas:c. Bugot, but aro we still goins on in the same manner the Bistrict Council was run. We have in tare ary thes an: rules yet
We hava male tio ruics for tho huse ubly what apout the other rules. If we sere to contimue usin; the 日fstrict Council laws, why then do we seclain the U.T. Government?

We talk of villajers roturnin; to their old villases. But wo aust work out the many rules which will be necessary for denarcatinis their boundaries, where they cro to settle etc.

Mon sanctionel is not realiy much, The system of building schools remains the same. The ficure of the eront may seem irm ressive but the need for public contribution is not lessened.

I would furthor like to mention about PWD and Medical Departrents. These are put separately because of technical nature ever since the British rulc. I want the Govt. would take note of their lack of procress. Regardins tender we used to say hieh or low. But I knew cloarly that they sive their favourites rosarddess of high or low, saying" Do you like to tare the work at the rate a little but hicier than the lowest.

It is also very difficult to contrul nedical dopartiment. The systen of promotion is not correct, they sinply violate it. Newspapor also mentioned everything and tris need to be examined.

Tolay, onethind I wiuld like to say is that Suclaran be sent back. Let Sundaram go homed ile spoiled PWD. If we can not transfered even Suncaran then let me resicn. I don't want to have such an useless man. Saah Departments where they function imeprendent cannot adjust themselves to the Vnion Territory. They regard themselves as the final authorities.

## PU LfinHilincrianglat if. Sieaker Sir, my fellow colloajuss need to consider that there is no benefit if we clirib

 up in our political status when the rise in economic status. I an not trying $t$, say about the budeet provisions tociny but I want t's sec these:(1) Scheruled tribes need nore protection In subnitting tenders for contracts, planapeople could offer lower rates I want th let it known to the authoritios. In P.W.D. tender, the earnest money for schoduled tribo is lowerod by $50 \%$, which is aplied only for the earnost moncy Tribals shouid be givon if his ratos be higher within7 $\frac{1}{2} \%$ This was proscribed als ut 17 yoars ago, and the need to protect them is Ereater now. We should moke lows for this. If we cannot do that, we shall not survive vary lone. (2) stopping of air dropinic is very sood as the oxpendituro on transportatisn is now aarned by the Mizos. (3) Let the Govt.run only state Transport as others did. Assam als.) has state transport coperation. as in Pu Ray's time, mantainin's many vehicles will not do good. Lut us be cereiul, it wlll not be good to heve any vahicles because we will never manage them successfully. It will be better to uplift the ierchantis Association.
(4) Lookinp at the budget, there is not much collected within our state, and the Govt. of India is givine us blank cheque and it is quite pleasing.
(5) Ruprcins Hextenue, I would like to dyear diout trade Licences. When selling properties, we can have sale Decds I don't know the reason why there is Asctt. Convissioner or Maxes for tax collection ami innink the tims has not come yet for this. Ac:ording to fonlole lembers it is very necessary to colloct taxes vury carefully, and I think Revenue Doportment is also too slow; I request not to invest fort. money in uxoess as we havo already $3 \mathrm{~g}_{\mathrm{y}} \mathrm{J}, \mathrm{c} \mathrm{ps}$. Then, we shall have more of rice and esscitin comadines.

PU R.ZOLIANA: ir.speaker Sir, we have a general discussion rogerding budet. The oous of Suppiemeritary Demand, and the Fievisod isstimate for 1972-73, and the Budget Betimate for 1073-74 are nuite thick, and there will not be dim to liscuss thea in detail. I wound like to ponit at shat I find hore important in the bulgut. Fhe weesh athe Fon ble Fin. Ministor had surmonedup thit budjeds main features. Therefora, I would lince to refor co some of the sijech.

Firetily, I was vory tuuched by wat he said"Instruacnt she chamiel of ralisation of econmies ance social olojetises". This mornine, our Soeaker sait explained the maxing of "budget"

Our buaget win.? grovide source of income for oar people, and its ather ain is to improve the woditions of the poonle.

Mot orly in tho economical aspect, even inthe Social aspect, the buige has very far roaching effects. Our ifinistry and the offices deserve praise for what they have done. If we inaginc ourselves in their places, w obell apprcciate the wurks they have dunc. We aust see if tir purpose of the budget is fulfillod, on wethor the money are misspent. We must se? that our nempe set the most benefit, otherwise corruption will becono ramont in our state.
irew times back, one hon'ble Member pointud out whet I fool inportant in Political field. In preparin; tho buiget and the specch of Fin. Minister on jage -1 we know that the Central Govt. is willing to help us. There have been wrons teaching
in this regard. It is cui.to wrong to preach that the amounts will be lower if sople do not support a certain party. Truly speaixing, I find quite pleasing that a regional party is the ruling party. According to the spech of Fin? Minister, the Central Govt. still hand us their understandins, sympathy, cooperation. I know from nersend knowledge the labour and time required to proparo a budgct, and it is really a matter for gratifulness that the authorities and office people could make this bud fet ready in so shopt a jeriod. So, it is necessary to be careful in teaching our people about the usc of loans and igrants. What I want to mention is, let hon'ble Members understand me, that we should be more concerned about our tribe"lizos" then our political affiliations. I want to mention this besides ry vote of thanks.
and I also want to rention abuut Supply Deptt. According to the Fin. Minister speech, rice are aaid to be in stock in some places alond the main Roads I am afraid that may not be quite correct, because reports of some officers to their superiors are sometimes not quite correct. We must also know that people can earn something from the transportation. Hoad load carriase are said to be given on contract. Is it not adviseablo to find some other system whereby tho villagers can earn the roney directly.

There is inclination to blame our leaders, but though we say that we have money for this and that, many of these things require approval of the Central Government. When such approval is not fortheoming, the money lie unspent and we try to put the blame on our leaders. Instead, the blare should rather be put on those who are at Delhi.

I an also fled that the Police and the Home Guards have been reorganiserl.

Other than the Supply, A;riculture, Transport and Bducation Departionts there are other Miscollenous Departriont which should not escape our attention.
kilso, regarding sub sidies, the Veterinary Departacnt sives more than $50 \%$ Su:ssidy when supplying pierlinss, wheress the Agriculture Depart. ruent can gife only $50 \%$ subsidios. Why should the proportion of subsilies differ within one State?.

It is stated that 2090 acres had been reclaimed under Crash Schome and Rurol Erployment Scheme. Many more people are keen to reclain land, and since this will open up lences for W.R.C., I want the Govt. to introduce some more such scheme.

In makin ievelopment schumes, nany of them are meant for grouper contros. But iy constituency and Chhintuipui District are not roused. There are many villages as large as some riped centres, and I request that these areas coull rijt be inorpat.

There are peojla why lantivation or who have fishery etc., nit who run oriphana;e, without seeking or expectins Govt's assistence I wuld 2ike the Government to spread cat its assistances to help these also, because they also are not without difficulties.
LALKLNGANA. Sreaker, one reason for the slow progrss is the non-lizzos take their lunch at no $n$, going home to have lunch cluring office hours. If they want to work in Mizoran, lat thentake food like the Mizos.

The Directors have no resject for out Ministers, they rathor gtive directions to our Ministers. This must be corrected immediately.

Doctors also do not seem to know they are to serve the pejple. Doctors of the Churches are better behave than those Govt. Doctors. The Government must find out ways to correct them.

We have A.C.S. Officers whose works deserve praise, But therc are people who are not in any Service Cadre, wh: supercede these A.C.S. Officers as finderaSecretarios btc., We must not neglect our ACS Officers.

When I submitted a resolution on Family Maintenance Allowance duringthe last bucket Session, the Chief ifinister gave the assurmes that the natter will be pursued. But nothint has been done yet. The money provised hore will not be sufficiont even if they share at the rate of the $1 /$ - each.

The Central Govt. instructed that M.N.F. rotumees would be given preference. But no preference. is ziven. The cancliate wio stoul first in the examination for Secretariat Service was not given aprointant on the ound that there is an adverse roport from the police. These MF returnees fron Hahinis but they are not alloted, any works, and where works are given to then uncor E. TH. (East)PWD, instructions were Given that they should not be favoured.

Road botirecn Phaileng and Parva had been surveyed but no money is proviled for its construction.

When rice were aitrdrojed one kit eould be pruchased with ?s t. 50. Now, that airdroping is stopped, why showed the price $: 0$ up?

Are you waiting foi tolo prow? you may not have suificiont time' if you all wait.

PD IALRINLIAN: Mí. Speaker Sir, I wlike lu saya few words anil i'll not use all igy time as I'll give it to Pג J. Thanjhuama. I would like the montion aiout the dizawl sanitation. Thoush our etreotsur inproving but we used to conc across swoejered in the streetss In my constituency at Bethleher Vonis, there is a place where all the rotton nirht soil of Aizawl town are thrown. This is very and. I have also suggested to remove these by vohicles and thrown away at some remote places. iut till $n_{i} w$, the problem is the same and it is necessary to change this soon.

Our streots abe so saall where as there are large number of vehicles. But fortunately w-e have not much accidents except in front of B. C.Deyss shop. I want this to be attendod by the PWD ideptt.
 dittle security for the public. There are bombing of Power house, and robbery at the point of guns arms. Ift is necessary to stop this kind of rowliness as soon as possible,

I don't really recomend our Transport Wing after Union Territory, I think it is where the corruption is riost ramant. There are a lot of what they say"Flyine sear boxes". They did not agree to load more than 30 quintals of Govemment gond.s. Including all the salaries of Drivor, handyman and mainteannce the Govt. spent much. So, if all this expenclitures are used for development, I thinkour country will be more benefited. Therefore, it is hieh time to solve this problen.

PU NGURLAWLA: itr. Speaicer Sir, I m very please for the proposed exponditure in our new budeat. Das to elisturbances, there is a lot of corruption, so it is necossary to umdte to sea how our buleat is implemented in order to stop corraption.

Our first duty is to finalise the appointment of Police S.Is, ASIs and the constables. Due to the delay many perple culd not do Jhuming and because we havc mane comitments to our the people. Therefore, it is not ritht to dolay this.

Onv reanum fior the weckness of the Goveminnt is tho slomess oi tho Dircetoratos. Even thoubh wo moy nowe miny onoloyoes, if they aro slow, thore can nevor io !ro ress. Therefore it is necessary t, shuffle tho stofiz。

There is a lot to say about our methud of cultivation, whick noods duick inprovemont. W noed $2 s$ ricultural uxports to see this. But, Incians will fail tis teach us. So, it is really ncoessary to havo oxpurts froj Japan or other jlaces.

If there is mo sulution, we must try to work nerd, sinee terrasin; also has no future. Therefore wo just finc jut experis to solve this problem for us.
