S P E A K E R

Minister i sawm tawh mai ang u
hmiang, awle PU Nirupam Chakma
i lo sawm ang u, pass han dil
nghal se.

PU NIRUPAM CHAKMA : Pu Speaker, thank you, first of all I'd like to thank Hon'ble members and the participated in the discussion. First layout like to take up Co-operation Department and points raised by Hon'ble Members to be clarified. But before coming to this I would like to highlights some of the aims and objects of Co-operation Department during 8th Five Year Plan.

The Department is taking initiative to become to face a challenge which the state of Mizoram is facing. That is how to become self sufficiency, how to attain self sufficiency in meats vegetable. That is, one programme we have taken in our Department and we hand seminar at Aizawl would like to have seminars in different places in Mizoram. The Second thing is that the Department is considering how to become self-sufficiency in edible well because we all know, mustured, Sesawm grown in Mizoram abundantly and this thing are going outside Mizoram and we the people of Mizoram are not utilising this for our consumption.

And the Mizofed it is proposed to Commission as our Hon'ble member, Pu P.C.Zoramsanglana has already highlighted that one of taking unit will be commissioned as early as possible. Then we have disintegrated fruit and vegetable project, this was prepared by NCDC, with an estimated costs of rupees three crores. And we hoping to get it through by the government of India. NCDC has prepared for us, and another scheme for diary, piggery, Cattle, poultry farming and necessary promissions had been made. They have recommended to the government of India.

The other scheme is also prepared by NCDC integrated Co-operative Development projects. This should be based in Aizawl district. We have scheme prepare by NCDC again for fishery Co-operative in Mizoram. We all know that fishery in Tlabung side is very prospective and the department is going to submit an ice's plan. So that this fish can be transported to Aizawl, Lunglei, Saiha and different places.

Now I am very thankful to the Honourable Members' Contributed their valuable suggestions. Now, we all know that Co-operation Department could not made way because of this insurgency problem long twenty years of insurgency, couldnot go to every village to organize feasible Co-operative. Now, activities has started and we are still in an infant state. But even than the

Co-operative department has taken the initiative. To start with the Basic necessity which Hon'ble Member Pu Rualchnina has highlighted that, Co-operative Education is the basic things necessary to give incentive in this Co-operative know how. The Mizoram Co-operative Union is involved in this and imparting Co-operative training. Various Co-operators during 8th Five Year Plan. We have yearmark rupees fifty lakhs, for construction of junior training institute. And this year in our budget, nothing is provided since there was instruction that no news should be included in the 8th Five Year Plan, or the first year of 8th Five Year Plan. So we have not provided any fund for the Construction of although we have the yearmark of in the 8th Five Year Plan.

Now, Hon'ble Member Pu Rualchhina has also highlighted G.I.A. subsidy grant. It is really unfortunate the Mizofed initial step got the side back because of several reasons and particularly after taking up this Ginger trade. Now, running in negative profit for along time that is why NCCF has study their problem and re-commended to rehabilitate Mizofed by matrix contribution by Mizoram government and central government They have recommended that eighty five lakhs, this should be given to the Mizofed for their utilization scheme and they have recommended government of Mizoram to give to contribute each year of 20 lakhs which we have included in this annual plan. And we are moving to the government of India to give the share of 65 lakhs. Regarding Mizofed problem, now as the house was informed that it has been taking so much difficulties in a money matters specially for metting petrol it is our Burden now. Since private agency are not working well. They cannot get petrol from Silchar Rs. 20 lakhs is being moved to the government for POL Wing and additional fund are also moved by the department and already recommended to the Finance Ministry. To give them Loan, additional fund for their daily actitities.

Now, since we all know as hon'ble member Pu H.Rammawi also highlighted that after increase of petrol price, deasel price. The Mizofed with their limited money, limitted fund may not be able to give whatever this allotted to Mizoram queta. Now this problem we see, and we have been requesting to the Finance Ministry also to see the problem is not faced by the Mizofed and also with the active co-operation of with Apex Bank. Now, in regard to success of Co-operative hon'ble member from Aizawl West Pu J.Thanghuama has highlighted to success of Co-operative mainly depends on Education.

The other reason is that we have found out after the proper scrutiny why Co-operatives are successful in Mizoram. We have seen that in many areas and feasible Co-operatives were formed. That is the main reasons besides several other reasons. Now par main target is to form feasible Co-operative. We ill see weather it is feasible or not and considering the locality, the

productiveness of that place. Co-operative are encourage to organise. We have decided to recruit it, or feasible Co-operative and the Co-operative in our city Aizawl, which are not working well. I hope within this year we will clear this job, and the remaining Co-operative will be of functional and prospective. To began this to meet our various programmes prepared by NCDC various project, we have initiated to orgnise fruit Co-operative which we called now Fruit forestry. So that we can avail fund from wasteland Development Board, we shall prepare project for us. And we are going to organise some more than 50 such Co-operatives this year. And we will covered all the villates within 5 yrs plan perios. Those Co-operatives, forestry Co-operatives besides giving fruit production. It will gives us a time to contribute in aforestation programme. As we all know that there are safety reserved in every village and we are hoping that this forestry and vegetable Co-operative will covered all the barren land, nearby their villages and thereby give an opportunity to earn fruit production and also meeting for firewood.

Now, we are talking about gas, sortage of Gas, sortage of petrol, after five years I think in the villages we shall be meeting the difficulties like sortage of firewood, and in some villages we just started now. So, the government of India is taking step and we will asked to prepare for that thing. Now to decide this, training facilities will be imparted to various Co-operators in the rural villages also. And we have already drawn up the calender for this year. Where in im- portant places Co-operative Officers will go and conduct training for the farmers conduct for various Co-operatives. And this process will continueing.

Now, I think I have breifly highlighted the problems and aims and objects of Co-ope- ration department and also clarifying the point raised by the honourable members regarding Co-operation department.

Now, coming to department of Sericulture, there was one question raised by hon'ble member Pu J.Thenghuama regarding the Financing position why sericulture is having the light fund this year than Co-operation department ? In this regard also first of all I would like to inform the house that although our budget may be small, here as it is seen. We have sereral schemes, that we have propost this year, within the 8th Five Year Plan to NCDC. Now, we came to sericulture department as hon'ble member has highlighted the basic necessity of training facilities marketting facilities, the quality of Cocoon which will make the quality of silk. First of all I would like to inform the house that Seri- culture is being a very highly technical department. Its success depends on how we manage and how we gives incentives to this development. Sericulture department has taken steps. To overcome this basic problems ensuring quantity,

Silk and their marketing facilities. As I have already informed the House that those two foreign schemes subject to approval will ensuring two purposes. One is consumption locally, the other is to produce disease free seeds which is very much important in our state, to bring success to the Sericulture industry. Besides this we have proposed to the North Eastern Council for establish mulberry seeds, establishment of mulberry nursery-cum clearing Centre at Champhai, farmer training Centre at Zemabawk Establishment of Ancillary cum-Technical Centre at Aizawl. Now, to impart training, the existing instituted at Zemabawk could not do much work, so much improvement, or much activities. Now, from this year onward we are hoping during April-May our training programme will start with 57 farmers. Besides this training facilities at Zemabawk the department proposes to sent mobile training Team to all potential area. Where Sericulture will be taken at the means of livelyhood. And wherever the demand is there, that mobile team will be fully equiped with all sorts of facilities. We are hoping that unless farmers are train, unless they know how to rear scientifically the silk worm, they will not be able to ensure its quality. And there by success Sericulture industry will be, if I use the wards 'doomed' it may be also applicable here. Regarding marketting we have sent our officers to our nearby state, where we ensure the rate of Cocoon is higher in Assam than Mizoram, and the Assam Sericulture department ministry has suggested as to be in contact with them and they also suggested us to establish one godown there, so there we can store the Cocoon for neady market. We are ensure the quality the Buyers will not purchase and there, by a reputation will lower. That is why one of the initiatives of the department now is to, how to ensure the quality for this reasons production of disease free seeds and also to imparting to farmers is the two necessary things. Besides this if we don't bough marketting for outside at present, since we are not up to the mark. We are thinking to consume our production locally, that is why we propose d that automatic silk rearing feature schemes which will be started at Zuangtui Industrial Centre. Subject to the approval by Taxtile Ministry. Besides this we are also proposing to install semi-automatic rearing machine in different farmers. So that we can substitute with castly labour by taking muster roll. Now the production cost is so high, because here labour is costly unless we replaced their with modern machine, Sericulture industry cannot come up.

Therefore, with our limited resources and also what we are hoping for the approval of our submitted scheme we may hope that production cost would bring down and we can seat out sáde, we can market outside only raw silk, which will give a better price for us. Now, to clarify some of the points regarding Sericulture department as the Hon'ble Member Pu J.Thanghuama has said, Mamit, Zawlnuam, Lokicherra, constituencies to be given priority, we will know to give priority and where

not to and where the facilities, there our department will take initiatives to see the prospect, specially the project, where it will come up. The process will go on and we shall try to cover not only this constituencies, throughout Mizoram since Sericulture is being included under the land use policy programme,

Now, I think I have already clarified the point raised by Pu Rualichhina regarding Sericulture. And one thing our hon'ble member has not seen page 319 of our budget demand book, where proposed we have transferred 30 lakhs rupees for Sericulture building to P.W.D. department. We proposed to contract this Sericulture building within five year plan. Now, Regarding the points raised by Pu H.Rammawi and Pu P.C. Zoramsangliana we see how much we can contribute to the Mizofed and our initiatives will go on. I think I have briefly highlighted some of the consent object and the points raised by the hon'ble members. May I request this August house to consider, to pass demand No. 40 Co-operation 1,95,10,000.00 demand No. 45. Sericulture 1,92,00,000.00 Total 3,87,10,000.00 only to pass

Thank you.
