PU NIRUPAM CHAKMA :  
MINISTER

Pu Speaker, thank you. First  
of all I must thank to all  
Members who are participated  
in the Discussion on the Demands  
of my Demands Nos. 46 and 47 in regard to Civil Aviation  
and Water Transport. I'm very happy that the Hon'ble  
Members have contributed their constructive suggestion  
towards the Welfare of the Departments.. And also I hope  
their suggestion will go a long way for making our De-  
partment effective and efficient and more commercially  
buyable.

As we all know, in Mizoram, the  
Transport Department has not been properly established  
till today because the Department in the Directorate  
level is looking after the Motor Vehicle Wing. In the  
Mizoram State Transport, the work load it has is very  
very heavy. That is why the Government felt that re-  
establishment of this Department is very much necessary  
so that the Mizoram State Transport can run effectively  
and efficiently and also make commercially buyable. At  
the same time, the Motor Vehicle-Wing which is enforcing  
the Motor Vehicle Act can make the revenues from Vehicle  
taxes etc. That is why in this year also if you have  
seen the budget, we had a proposal to establish a com-  
missariat which will be a totally separate from the  
Mizoram State Transport. The Government is considering  
at present to set up in this coming financial year at  
least with the Deputy Commissioner level. If we cannot  
have a Commissioner of Transport, We must have at least  
the Deputy which will be heading the Motor Vehicle Wing.  
And with this hope, I think once we come to that point  
to that extent the Transport Department will be working  
well and it will really make a buyable Institutions and  
also remove the difficulties which are faced by the  
publics, the Government and others.

First of all, I would like to  
give a bit detail about Civil Aviation Department also.  
As we all know, we are all concerned that we had no

Airport here. The small Airport we have in this Tuirial is not giving us a credible services for we cannot bring bigger Aircraft, so that the Government up-to date has taken lots of initiative to have a bigger Airport which will be the most essential for the improvement of this region especially a state like Mizoram. Well, the Transport facilities is very much in poor condition. Therefore, with the initiative of our Government, the officials today, we dan at least hope that there will be Airport at Lengpui which we expect according to the National Airport Authority seems to be seated recently. And also the Ministry of Civil Aviation. And if all things goes well, we may had the Airport within two to three years time. And it will be no means a significant achievement on the part of a Government and also the Department that to have this kind of achievement in Mizoram is a very very rare occasion. And I hope, we, during our time at least we shall be lucky, let us hope we shall be lucky with our full efforts.

Now, in regard to many discussions. I would like to highlights some of the important issues, most of the Hon'ble Members have pointed out. As regards to Transport corporation which is very good suggestion. I must thank all the Members who had suggested this point. The Government is thinking it is under examination in fact whether to have a Government run Transport Department or to have Corporation like which many other States are having. But our Officers they have made some survey to the neighbouring States which shall have run this Corporation. But it seems that an their report, we can assume that the corporation running in the neighbouring states also are not functioning well and they have not made so much profit. That is why, Mizoram, in this Corporation up till now has not made much head way. So that we can be surely reliable on this having a corporation. But in fact, at this point we are just examining the issue and we hope this will come in a complete safe in the successful year to come. But at present we proposed to have this Mizoram State Transport which will run by the Government. There is a lot of issues raised by the Hon'ble Members regarding the profit making by the Mizoram State Transport. In fact, as we all know, we had not yet could not make this infrastructure built. As we all know Central Workshop which is almost completed, and the position is now if we want we can still occupy. But there are some works to be done. That is why we are waiting for that and our biggest problem is the electricity problem which had been initiated by our Departments, the officials, the concerned Department. And we had already transferred the money for having three face electricity connection. Without which we cannot occupy the Central Workshop now.

And once this Central Workshop is occupied we shall be sitting all our buses to be repaired there. And also the machineries which Hon'ble Member Pu Tlangmingthanga has mentioned the

machine purchased for the Central Workshop has not been occupied, installed till today. We need many more machines which we are initiating. Last year in the Current Financial, we have purchased some machine which will be installed very soon. Therefore, until and unless everything is ready, we cannot just occupy the building.

As I said the Electricity problem, part from that some security function is required and for which we had year mark the fund and this will be completed by the Public Works Department. Now, we are spending so much money maintenance charges and also for this repairing. There is no doubt that in some places sometimes, we have to engaged the private workshop for repairing depending on the nature of repairs needed to private workshop. So once we can occupy this Central Workshop. I think we can minimise the expenditure in the repairing charges. Not only that, we shall look after the other Department Vehicles also. So that we can give with minimum this repairing charges facilities. We hope this will come a long way and very soon we shall be going to this Central Workshop.

The other thing, the issues which the Department is facing at present is that there is lot of things which the Department cannot make profit. There is lot of difficulties which we are facing and to minimise this, we have taken lots of initiative like the oil consumption which was very much high in Mizoram. We are training our drivers how to conserve oil, the Petroleum required diesels and for that a training programme. I think we will be conducted very soon. So that they can be more effective in knowing how the oil is consumer. These are the few initiative we are taking to strengthen our Department. Regarding this, some Hon'ble Members have pointed out regarding in the last conductors, formation of conductor. In the last question I had already replied them the Government is examining this, and this we will do it very soon.

Regarding some issues which we had in our questions and answers sessions few days back regarding M.V.I. I hope as I replied, the replied may not be satisfactory to Hon'ble Members, but I hope as it is the confidential till today it seems the result has not come out. So I must not exerate here, so to keep more effective to the issue. I think, we will see this. We really share the sentiments of the Hon'ble Members,

Regarding Water Transport which M.L.A. from Tlabung Pu Hari and Opposition Group Leader had pointed out. The Department had already taken some initiative to operate this Water Transport facilities with small Engine Boat for which the Department has initiated to purchase some engines to operate in the Tlabung side. Because this is, an advantage proposal. It will give a good revenue also. Apart from giving facilities to the people over that area like Chawngte,

Marpara, Tlabung, Borapansuri etc. Water facilities in fact is the main communication which is existing in the most part of area, because where the Vehicle cannot go the people has to go by boat which is time consuming. Once this engine services is introduced, a lot of inconveniences shall be removed for the public. And we hope this will be really effective.

Regarding roll call for drivers which some Hon'ble Members had pointed out, I think, this we will see how to remove. There is inconveniences at all.

Regarding some Members had pointed out about the loss of Vehicles Pu Rammawia from Sangtu and Hon'ble Member from Ngopa. The Government has now report such. If there is any we shall certainly inquire losses and some Pu Zosiama has pointed out that, some private Vehicle has been used for private purposes that we will inquire if there is anything. But so far we do not know anything.

\* Hon'ble Members from Ngopa, Pu Zosiama has said the Department has been corrupted. I do not know about this but I will certainly see and that thing will never happen in this Department.

Now, some of the points remaining in the Transport Department raised by Member from Ngopa Pu Zosiama. He said that there is no bus for Ngopa. I don't think there is such inconvenience and it is very unfortunate and we will certainly look into it. In fact, we had so many buses and we want to operate as many as places we can. For that reason, if we can increase our roads, we will get more revenue on that. That is why if any Members has any problem in their Constituency. I would certainly welcome their suggestion to give bus services in those areas. If our Members need any thing, I request all of you to bring the notice of the Government, so that we can take correct measure.

Pu Hari said that two buses may be needed for Tlabung. In fact, we had taken some initiative, I do not know what is happening. I also know personally and we shall certainly look into it.

Regarding this rail way out agency, I would like to inform all the Hon'ble Members here that we have already signed an agreement with the railway authority, for giving out tickets or selling tickets from this railway out agency Aizawl. But we needed some amendment on some issues so that problem does not arise regarding getting of bills etc. I hope in April this year, we shall certainly can operate the railway out Agency and we can also issue the ticket from here. At present also we can book railway tickets everywhere in India. We have some Quatas in every

parts of India and if there is any inconvenience for the public that will be remove in the month of April, as far as possible.

Regarding Telephone connection at workshop it is a problem because even in the Central Workshop which we are proposed to occupy, in that also we required this Telephone facilities for effective management.

One point raised by the Hon'ble Members and to the Department of Civil Aviation. Civil Aviation as we have seen, so many Members have pointed out the improvement of Tuirial Airport. I would like to inform the House that initiative is being at hand. To improve Tuirial Airport at least to extent the building where the departure loans, arrival loans will be there and some rooms for the sick person. There is also some Members mentioning about Telephone. Telephone at Tuirial is not working at present. In fact, it has been disconnected because the telecom department has charged us more money. Our Department Officers wanted some clarification from them, how the bills has come so much, for installation itself it has come to more than 80 thousand. The Telecom Department has insisted to give the monthly charges. For this reason, the Communication between the Department and the Telecom Department for which we are facing this problem. But recently, the National Airport Authority has written a letter to us asking to transfer the Telephone in their names so that they can give the bill and operate the Telephone. In that way, we shall be saving lots of money also.

Members from Lunglei, Pu Biaka is very much concerned about Khamzawl Airport and I would like to tell that I'm also from that side and I'm also very much concerned to this Khamzawl. And I hope our Hon'ble Member will understand me. The initiative the Government has taking in regard to this Lengpui Airfield, on 23rd some visited Lengpui by road. On 24th a rail survey was done was done with Airport Helicopter. Reaction is that it will be suitable for them. And now they are asking for the Government to clear the jungle so that the team of Engineers will come for clear survey. And I hope the Government will initiative to clear the jungle. The Rural Development Department is also very much concern to this, and we are also having discussion on this. If everything goes well the project will be completed within two to three years of time. I think I have greatly highlighted issues raised in the House and with this few words I must thank all the Members who have participated here in the discussion and also participated with their beneficial suggestion. It was for the welfare of Transport & Civil Aviation. And I hope there is more effective to this Department for which the Government will be earning revenues and also remove the inconveniences of the public Mizoram.

Thank you.

( Speaker : Pass kha dil rawh). I'm sorry Mr. Speaker Sir. I think with this, what I said on my speech Demand No.46 - Civil Aviation Revenue 1 crore 90 lakhs, Demand No.47 - Road and Water Transport Revenue 6 crore 72 lakhs Capital 35 lakhs, total 8 crore 97 lakhs may kindly be passed by this August House.
